MAYBE,

BUT TIME SPENT REVISING IS NEVER WASTED.

AND YOU NEVER KNOW,

ON EXAM DAY,

THINGS MAY NOT GO TO PLAN...

STAY FOCUSED AND YOUR HARD WORK WILL PAY OFF.

TIME'S UP.
PUT YOUR PENS DOWN.

BROUHAHA

BROUHAHA

BROUHAHA

LET'S HEAD
TO THE HIDEOUT!

LET'S TELL SAGE AND ROBY
HOW IT WENT.

HOW DID IT GO?

I'LL TELL YOU HOW I THINK IT WENT.

FOR WEEKS NOW YOU'VE
BEEN DOING YOUR WORK
WITH TOPMINDXXL.

THE NEW
ARTIFICIAL INTELLIGENCE.

AS A RESULT,

YOU'VE STOPPED LEARNING,
AND YOU JUST COPY WHAT
THE AI GIVES YOU.

BUT IT WORKS!

I'M TOP OF THE CLASS,
YOU SEE!

THE AI WOULD DEFINITELY GET A GREAT GRADE.
BUT IT'S NOT YOU, AND YOU'RE NOT IT.

I KNEW IT...

YOU'VE BEEN
CHEATING...?

YOU LOOK AT YOUR PHONE
UNDER THE DESK?

BUT... WHY DOES
IT EXIST IF WE'RE
NOT ALLOWED
TO USE IT?

IT CAN HELP YOU,

IT'S LIKE SNEAKERS.
YOU GO FURTHER WITH
THEM... BUT YOU DO THE
WALKING AND NOT YOUR
SHOES!

DON'T CONFUSE 'KNOWLEDGE'
WITH LEARNING.

YOU MAY THINK YOU KNOW SOMETHING IN
THE MOMENT, BUT IT'S WHAT YOU'VE REALLY
TAKEN IN THAT COUNTS. WHAT YOUR BRAIN
REMEMBERS WHEN YOU NEED IT.

YOU MUST BE
CAREFUL!

ADVICE BOX

- **Your brain is like a muscle. It needs exercise.**

If you want to get better you must work your memory, attention, logic, creativity and more. No AI can do that for you. Your mind will grow stronger if you really revise.

You must learn in many different ways, and each person will learn at their own speed.

Learning also means occasionally making mistakes along the way and then fixing them. There's satisfaction in accomplishing things yourself.

- **AI consumes!**

Each time we use AI (even for a simple prompt), it activates very powerful computers, which we call servers - sometimes on the other side of the world in large data centers.

And it consumes a lot of energy and water. So, we must think carefully before using AI if a simple dictionary, search engine or trusted adult doesn't already have the answer.

- **Warning: AI can sometimes be wrong.**

What it tells you can seem super intelligent ... but sometimes, it's wrong! You should ask yourself questions and check the information against other sources. Be careful for mistakes and sometimes even hallucinations (invented answers) because they can lead to bad decisions.

REMINDER

AI can be helpful ... but you need to learn and not it. Your brain will always be your biggest help, and AI uses a lot of energy. So use it intelligently.

Be curious and believe in yourself: you have everything you need to succeed.

WHAT NOW?

ONE THING IS SURE...
